

ozone Ground Level

GAMING MOUSEPADS

available in two sizes to fit your gaming style

low weight and flexible
roll it up and you're ready to go

OVERVIEW

The Ozone Ground Level is a series of mousepads designed with gaming in mind. There are lots of different mousepads in the market and finding the best is not an easy task. Ground Level mousepads have a soft cloth surface with perfect texture for speed glide, and it's the right material for low noise and high comfort use.

The base is in rubber foam that assures the best grip so you don't have to move it or correct its position when you're in the middle of the game.

Ground Level mousepads are low weight to improve portability, and you can simply roll it up and you're ready to go. The 2mm height is one of the major features for this mousepads, because there are similar mousepads in the market with 1mm and even less. Ground Level is available in two different sizes so you can choose what adapts best to your gaming style: Ground Level Regular if you play with your arm, and Ground Level S if you play with your wrist.
